

Features

1 Fluorescent light fixture with interior sealed glass offering a safe and bright working area (100 foot candles)

2 SEFA-8 Superior chemically resistant paint finish

3 Large louvered by-pass area for optimal air balancing

4 32" high front opening creating superior interior viewing

5 Generous 26 1/2" interior working depth while maintaining a 32 3/4" exterior overall dimension

6 Optional pre-plumbed service fixtures using approved flexible materials

7 Interior lining components are available in non-metallic or stainless steel finishes

8 Aerodynamic sash opening designed for minimal air turbulence

9 Self supporting steel structure adding strength and flexibility

10 All electrical components are CSA/UL approved and prewired for final single point connection

11 Optional audible and visible low velocity alarm

12 All electrical and plumbing components are safely located outside of the hood chamber

13 Laminated safety glass sash

14 Listed by Intertek to UL 1805 standard

15 Interior access panels are easily removable and replaceable without the used of special tools

16 Convenient pre-punched interior & exterior service holes for plumbing additions

17 Factory set interior baffles

18 Stainless steel air foil designed with electrical cord access

Secure Containment

Laboratory personnel safety is the primary performance criteria of a fume hood. Vanguard's Critical Airflow Path (CAP) design includes a high containment baffle configuration that controls and increases the air velocity within the hood to create a constant laminar flow at the face opening.

To confirm our own research we had our hoods tested by SIEMENS, a recognized independent testing company, using the ASHRAE 110-1995 AM protocol. Face velocities of 100 FPM and 60 FPM were used and in both cases performance results far exceeded industry standards.

Superior containment even at lower face velocities*

Industry Standard
ANSI/AIHA Z9.5-2003
.05 ppm

Example: VBA-48 with full sash open	
Vanguard at 100 fpm	Vanguard at 60 fpm
0.001 ppm	0.003 ppm

* Results taken from Siemens test reports

Superior face velocity uniformity*

Industry Standard
ANSI/AIHA Z9.5-2003
+20%
-20%

Example: VBA-48 with full sash open	
Vanguard at 100 fpm	Vanguard at 60 fpm
+7.1%	+8.6%
- 5.1%	- 6.4%

* Results taken from Siemens test reports

Vanguard hoods meet or exceed the following industry standards:

- ▶ **SEFA 1-2010** Laboratory Fume Hoods Recommended Practices
- ▶ **ANSI/AIHA Z9.5-2012** An American National Standard for Laboratory Ventilation
- ▶ **MD 15128-2013** Laboratory Fume Hoods
- ▶ **CSA Standard C22.2 No. 1010.1-92 & CSA-US**
- ▶ **NFPA 45-2001** Standard on Fire Protection for Laboratories using Chemicals
- ▶ **OSHA 1010.1450 – 2011** Occupational Exposure to Hazardous Chemicals in Laboratories
- ▶ **Prudent Practices in the Laboratory: Handling and Disposal of Chemicals (2011)** National Research Council
- ▶ **Industrial Ventilation (27th Edition)**
- ▶ **UL 1805 – 2002** Standard for Laboratory Hoods and Casework

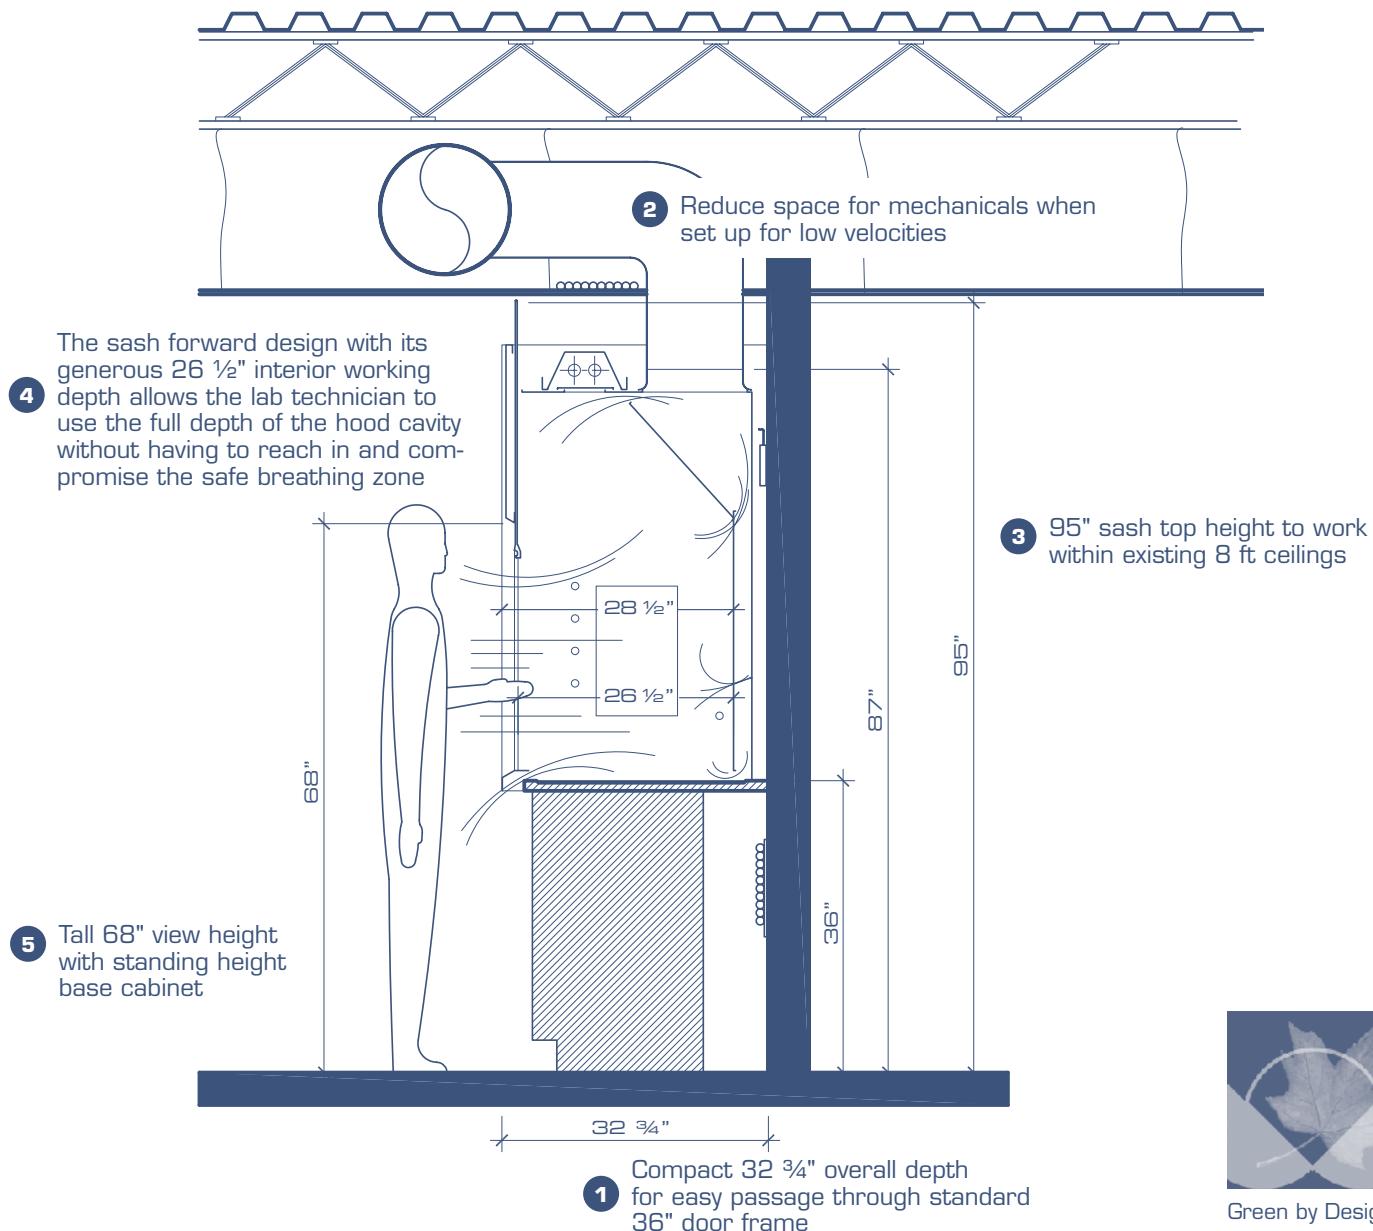

Low Velocity Capability

In appropriate laboratory environments, low velocity fume hoods are an effective tool for designers and facilities managers who want to build green and maximize economic and environmental performance. Their low exhaust volume can considerably reduce a laboratory's energy consumption. In addition to reduced operating costs, a low velocity hood set-up can also significantly reduce HVAC infrastructure costs.

The performance of a fume hood is measured by its ability to move air cleanly through the hood and away from the user. We focused on the critical airflow paths to provide optimal containment and then further improved the design to maintain high performance at reduced face velocities.

The Vanguard was designed using advanced 3-D engineering software. The computer models helped us shape the airflow within the parameters of conventional laboratory use, and the subsequent months of fine-tuning allowed us to effectively maintain superior containment with face velocities down to 60 FPM. Numerous minute adjustments were tested in our in house testing facility to further eliminate turbulence and dead air pockets. The result is true high performance by design. With the Vanguard there is no need to work with restrictive sash openings to reduce the amount of exhausted air, its performance numbers are achieved with a full open sash.

Green by Design

Vanguard laboratory fume hoods, through high performance by design

- ▶ Low velocity capability on all models.
- ▶ 18 gauge painted steel exterior paneling.
- ▶ Galvanized steel structural frame holding the outside paneling and interior lining.
- ▶ Sash forward design that permits an ergonomic access to the work surface and extra inside depth.
- ▶ ¼" safety laminated glass used for various sashes and lamp protection shield.
- ▶ Aerodynamic Type 316 stainless steel air foil with electrical cord access.
- ▶ Rounded bell shaped Type 316 stainless steel duct stubs.
- ▶ Easily removable factory pre-set baffles installed with non metallic supports.
- ▶ Sash counter weight system using two 3/32" – 920 lbs breaking strength stainless steel cables and ball bearing pulleys with a full width balanced weight.
- ▶ Fluorescent lamp with switch creating a 100 foot candles inside hood.
- ▶ Two post mounted 120V/20A duplex outlets.
- ▶ All electrical components pre-wired to a junction box located on top of the hood.
- ▶ Pre-punched holes in lining and on front posts to receive optional plumbing services up to 5 per side.
- ▶ Easy access to plumbing services using outside removable side panels and/or interior leak free panels.
- ▶ Generous 26 ½" interior working depth on standard 32 ¾" outside fume hood depth.
- ▶ Listed by Intertek to UL 1805 and CSA standards.

Vanguard meets or exceeds SEFA (Scientific Equipment & Furniture Association) requirements**Manufactured under our ISO 9001 Quality Program****High value sustainable designs to meet environmental challenges of the laboratory industry**

Constant Air Volume or Variable Air Volume models no.

Standard Features

- ▶ Vertical rising sash with black PVC handle.
- ▶ Generous 26.5" interior dept with standard 32.75" O.D (32.5" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 68" with standard 36" base cabinet.
- ▶ Aerodynamic T.316 Stainless steel air foil with electrical cord access.
- ▶ Removable factory set interior baffles.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 10 plumbing fixtures.
- ▶ Removable and easy replaceable interior access panel on each side wall for plumbing access.
- ▶ Removable exterior side panels.
- ▶ Upper and lower bypasses with interior adjustable top front panel. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

It is recommended to add a 3 % safety leak factor to all above exhaust calculated volumes in order to compensate normal site system air leakage.

CAV or VAV Fume Hood / Split Sash**Standard Features**

- ▶ Two Vertical rising sashes with stainless steel handle and frame.
- ▶ Generous 26.5" interior dept with standard 32.75" O.D (32.5" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 68" with standard 36" base cabinet.
- ▶ Aerodynamic T.316 Stainless steel air foil with electrical cord access.
- ▶ Removable factory set interior baffles.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 10 plumbing fixtures.
- ▶ Removable and easy replaceable interior access panel on each side wall for plumbing access.
- ▶ Removable exterior side panels.
- ▶ Upper and lower bypasses with interior adjustable top front panel. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

It is recommended to add a 3 % safety leak factor to all above exhaust calculated volumes in order to compensate normal site system air leakage.

CAV or VAV Fume Hood Distillation / Vertical Sash

Standard Features

- ▶ Vertical rising sash with black PVC handle.
- ▶ Exterior height and sash view height are both taller than the regular fume hood by 10"
- ▶ Generous 26.5" interior dept with standard 32.75" O.D (32.5" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 72" with low height 28.75" base.
- ▶ Aerodynamic T.316 Stainless steel air foil with electrical cord access.
- ▶ Removable factory set interior baffles.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 10 plumbing fixtures.
- ▶ Removable and easy replaceable interior access panel on each side wall for plumbing access.
- ▶ Removable exterior side panels.
- ▶ Upper and lower bypasses with interior adjustable top front panel. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

CAV or VAV Fume Hood ADA / Combination Sash

Standard Features

- ▶ Combination sash with painted steel handle.
- ▶ Generous 26.5" interior dept with standard 32.75" O.D (32.5" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 65.75" with standard ADA height 32.5" base cabinet.
- ▶ Aerodynamic flush sill T.316 Stainless steel with spill trough and electrical cord access.
- ▶ Factory set interior baffles removable.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 10 plumbing fixtures.
- ▶ Removable and easy replaceable interior access panel in each side walls for plumbing access.
- ▶ Removable exterior side panels.
- ▶ Upper and lower bypasses with interior adjustable top front panel. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ Lower location of Electrical and plumbing fixtures per ADA requirements
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

It is recommended to add a 3 % safety leak factor to all above exhaust calculated volumes in order to compensate normal site system air leakage.

CAV Fume Hood - Auxiliary / Vertical Sash**Standard Features**

- ▶ Vertical rising sash with black PVC handle.
- ▶ Generous 26.5" interior dept with standard 32.75" O.D (32.5" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 68" with standard 36" base cabinet.
- ▶ Aerodynamic T.316 Stainless steel air foil with electrical cord access.
- ▶ Removable factory set interior baffles.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 10 plumbing fixtures.

- ▶ Removable and easy replaceable interior access panel on each side wall for plumbing access.
- ▶ Removable exterior side panels.
- ▶ Upper and lower bypasses. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ Front upper intake plenum with inside deviation filtering grills.
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

Constant Air Volume Fume Hood Pass Through / Vertical Sash

Standard Features

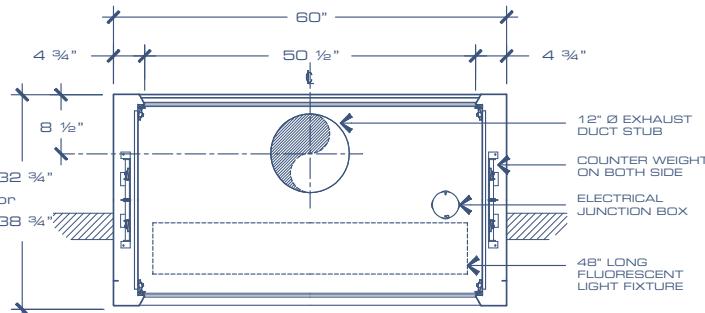

- ▶ Vertical rising sash with black PVC handle.
- ▶ Generous 27.375" interior dept with standard 32.75" O.D (33.375" ID with 38.75" OD hood).
- ▶ Tall front opening view height of 68" with standard 36" base cabinet.
- ▶ Aerodynamic T.316 Stainless steel air foil with electrical cord access on both sides.
- ▶ Fluorescent light, light switch and 2 duplex 120V - 20A with internal wiring on 1 circuit.
- ▶ Front corner posts & interior side panels pre-punched to accept up to 5 plumbing fixtures.
- ▶ Removable exterior side panel.
- ▶ Upper and lower bypasses with interior adjustable top front panel. For VAV models only.
- ▶ Cable and pully sash system.
- ▶ Stainless steel 316 round exhaust collar.
- ▶ White polyester FRP lining $\frac{3}{16}$ " thickness.

It is recommended to add a 3 % safety leak factor to all above exhaust calculated volumes in order to compensate normal site system air leakage.

Optional base cabinets

(bedcolab)

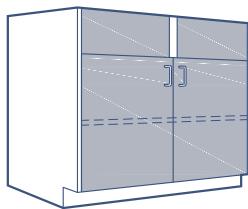

Various optional fume hood base cabinets are shown in our painted steel Forte Inset line catalog including the following types of cabinets normally used under a fume hood.

Service Cabinet

Cabinets normally used to service a sink installed in the fume hood. Includes one adjustable shelf and a fixed upper panel for mounting of services.

Optional Electrical Services

LIGHT SWITCH - STANDARD

Model no. VEK-01

- ▶ White switch 15/20 Amps.
- ▶ White plastic cover plate

ELECTRICAL RECEPTACLE

Model no. VEK-02

- ▶ White outlet 125 Volts - 15/20 Amps.
- ▶ Polarized 3 grounding wire type
- ▶ White plastic cover plate

GFCI ELECTRICAL RECEPTACLE

Model no. VEK-03

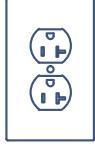

- ▶ White outlet 125 Volts - 20 Amps.
- ▶ Polarized 3 grounding wire type
- ▶ White plastic cover

GFCI ELECTRICAL RECEPTACLE ASSEMBLY

Model no. VEK-04

- ▶ White top GFCI outlet wired to
- ▶ White bottom 125 Volts - 20 Amps. outlet
- ▶ Polarized 3 grounding wire type
- ▶ White plastic cover plates

ELECTRICAL RECEPTACLE

Model no. VEK-05

- ▶ White outlet 220 Volts - 30 Amps.
- ▶ Polarized 3 grounding wire type
- ▶ White plastic cover plate

ELECTRICAL RECEPTACLE

Model no. VEK-06

- ▶ White outlet 250 Volts - 30 Amps.
- ▶ Polarized 3 grounding wire type
- ▶ White plastic cover plate

FAN SWITCH - PILOT LIGHT

Model no. VEK-07

- ▶ 120 OR 240 Volts - 20 Amps.
- ▶ 1-Pole Square D 3 wires
- ▶ Aluminum cover plate
- ▶ NOT WIRED

OPTIONAL DIGITAL FUME HOOD MONITOR

Model no. ROOSTER Sensor 100

- ▶ Air Velocity and temperature sensor with touch screen display using an instrumentation grade sensing element installed into the top hood collar.

CUT OUT FOR VAV MONITOR

Model no. VCO-01

- ▶ Need to mention manufacturer model no. to be installed on the hood

EXPLOSION PROOF SWITCH

Model no. VEK-08

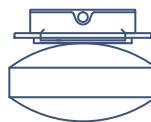

- ▶ 120 Volts - 20 Amps.

EXPLOSION PROOF RECEPTACLE

Model no. VEK-09

- ▶ Single 125 Volts - 20 Amps.

EXPLOSION PROOF LIGHT FIXTURE

Model no. VEX-01 for 48" hood: 1 x 36"

Model no. VEX-02 for 60" hood: 1 x 48"

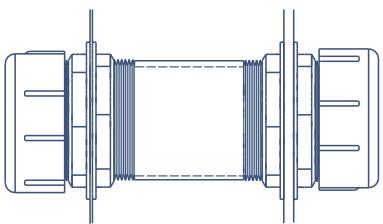

Model no. VEX-02 for 72" hood: 1 x 48"

Model no. VEX-03 for 96" hood: 2 x 36"

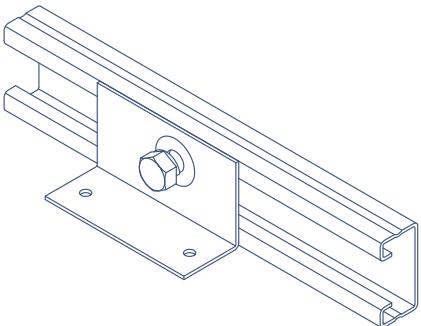

Model no. VEX-04 for 120" hood: 2 x 48"

Model no. VEX-04 For 144" hood: 2 x 48"

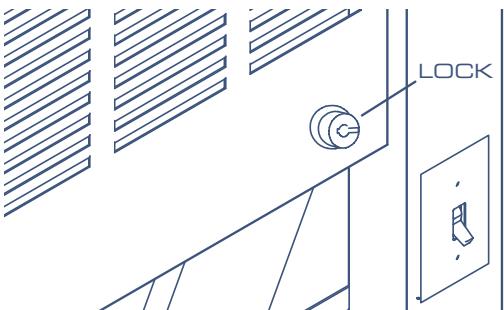

- ▶ Polycarbonate Housing material
- ▶ Parabolic high emission reflector
- ▶ Complete light emission, 100% UV Stabilized (to reduce yellowing index)
- ▶ 120 Volts

**SIDE WALL PASS-THRU GROMMET**

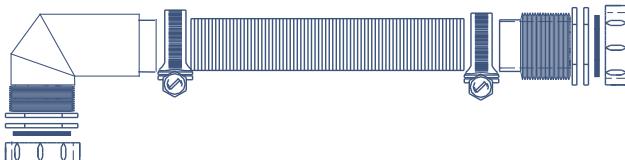

- ▶ 2" diameter – Model no. VGS-02
- ▶ 4" diameter – Model no. VGS-04
- ▶ Located at 7" from hood front and 2.75" from counter top

**FUME HOOD SEISMIC BRACE**

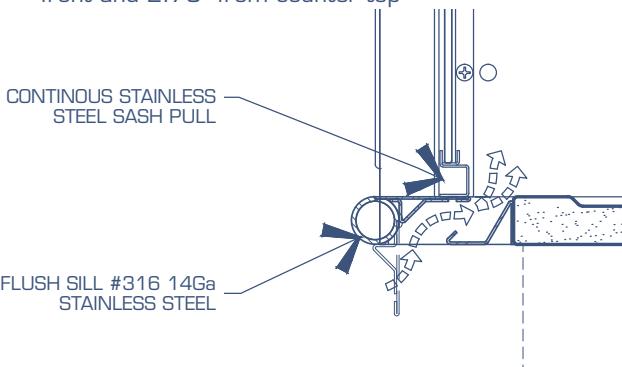

- ▶ Model no. VSB-48 for 48" hood
- ▶ Model no. VSB-60 for 60" hood
- ▶ Model no. VSB-72 for 72" hood
- ▶ Model no. VSB-96 for 96" hood
- ▶ Model no. VSB-120 for 120" hood
- ▶ Model no. VSB-144 for 144" hood

**OPTIONAL VERTICAL SASH LOCK
FOR BENCH HOOD ONLY**

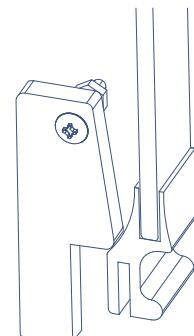

- ▶ A locking system to prevent hood utilisation when not required. Locking position possible when sash is fully down.
- ▶ Available on the following fume hood types: Regular, ADA, Radio-Isotope and Auxiliary hoods
- ▶ Model no. VVL-48 for 48" hood
- ▶ Model no. VVL-60 for 60" hood
- ▶ Model no. VVL-72 for 72" hood
- ▶ Model no. VVL-96 for 96" hood

**FRONT POST MOUNTED
PASS-THRU GROMMET**

- ▶ 2" diameter – Model no. VGF-02
- ▶ Inside location at 7" from hood front and 2.75" from counter top

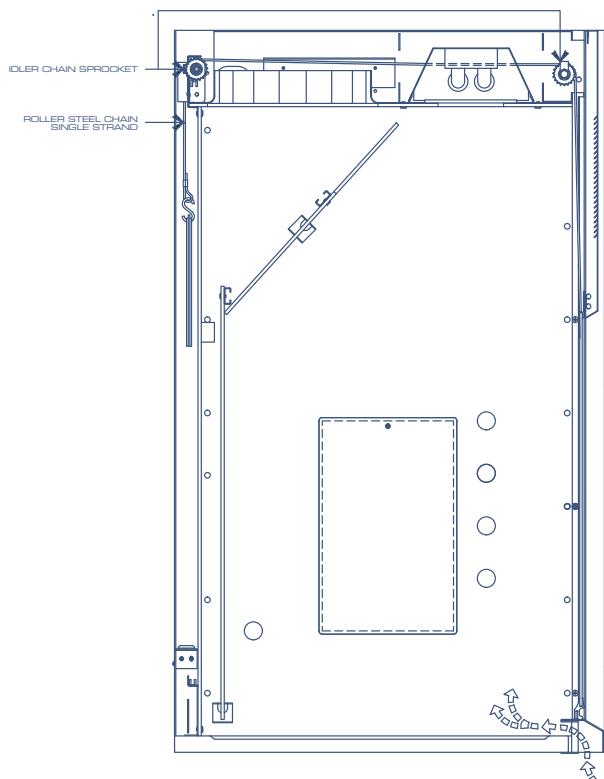

**FLUSH SILL OPTION**

- ▶ Standard on ADA hoods
- ▶ Available on the following fume hood types: Regular, High view, Californian, Radio-isotope and Auxiliary hoods.
- ▶ Model no. VFS-48 for 48" hood
- ▶ Model no. VFS-60 for 60" hood
- ▶ Model no. VFS-72 for 72" hood
- ▶ Model no. VFS-96 for 96" hood

**GRAVITY SASH STOP**
Model no. VS-01

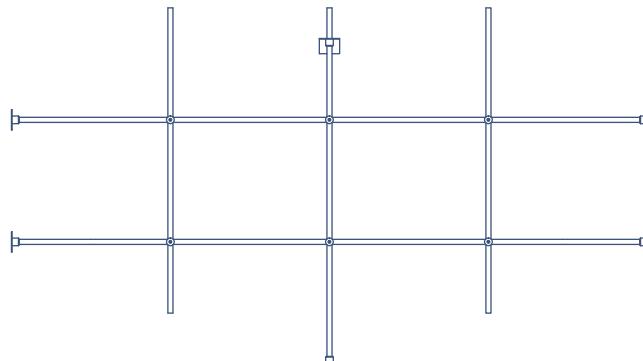

- ▶ Designed to stop the sash at an 18" sash opening.
- ▶ Installed behind sash pull.
- ▶ Can be manually removed.

Optional Accessories

OPTIONAL CHAIN & SPROCKET SASH SYSTEM

- ▶ Available on the following fume hood types:
Regular, ADA, High view, Californian,
Radio-isotope and Auxiliary hoods.
- ▶ Please add the following model no. into
the Fume Hood order sheet on page 43.
 - ▶ Model no. VCS-48 for 48" hood
 - ▶ Model no. VCS-60 for 60" hood
 - ▶ Model no. VCS-72 for 72" hood
 - ▶ Model no. VCS-96 for 96" hood

AUTOMATIC SASH CLOSER OPTION FOR VAV HOODS ONLY

Model no. VSC-01

The Automatic sash closer option is a mechanical system that close the fume hood sash down to the established operating position when the sash is released from any higher open position.

Available option on all vertical sash fume hoods.

SASHMATIC AUTOMATIC DETECTION SASH CLOSER OPTION FOR VAV HOODS ONLY

Model no. VSC-02

THE SASHMATIC is a smart laboratory fume hood option to be used with a VAV system which permits additional energy saving, extra lab safety and ease of hood sash use. The integration of cutting edge technology such as motion detection and object detection can help achieve significant energy savings while providing maximum protection to the users.

Motion presence detector is infinitely programmable upon user requirements and will close the sash down from any position.

Sash can be manually opened or closed at all time simply using the sash pull or the control panel buttons.

Equipped with an intuitive control panel, it offers the user the ease of controlling the door by choosing preset positions while providing the flexibility to move the door manually at any time.

The object detection sensor will stop the sash movement as soon as an object of any nature and size obstructs the sash course.

FIGURE 1 : CONTROL PANEL

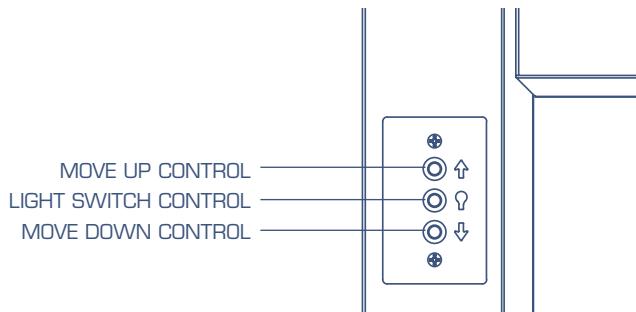

FIGURE 2 : SASHMATIC VIEW - DOOR CLOSED

MOTION DETECTOR

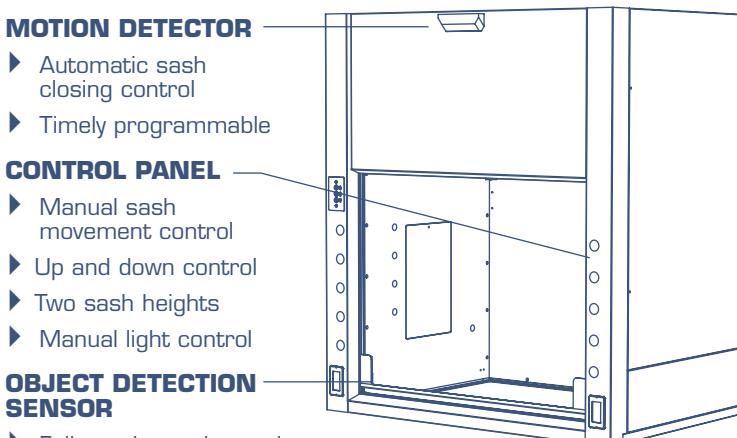

- ▶ Automatic sash closing control
- ▶ Timely programmable

CONTROL PANEL

- ▶ Manual sash movement control
- ▶ Up and down control
- ▶ Two sash heights
- ▶ Manual light control

OBJECT DETECTION SENSOR

- ▶ Follows the sash opening
- ▶ Detects any object in the sash course

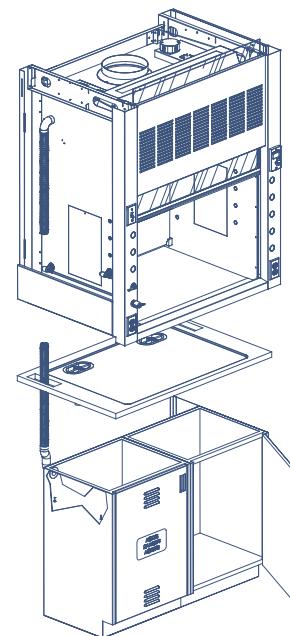

CORROSIVE AND PUMP CABINET VENTILATION KIT

- ▶ Model no. VVK-01
- ▶ From cabinet back up to fume hood interior through hood wall.
- ▶ Grey high strength fiber reinforced PVC hose 2" bonded to coated spring steel wire helix.

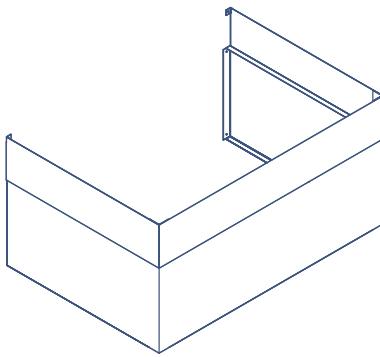

FLAMMABLE CABINET VENTILATION KIT

- ▶ Model no. VVK-02
- ▶ From cabinet back up to 48" over fume hood, done through hood wall for connection to the mechanical conduit (connection by others).
- ▶ Stainless steel flexible piping 2".

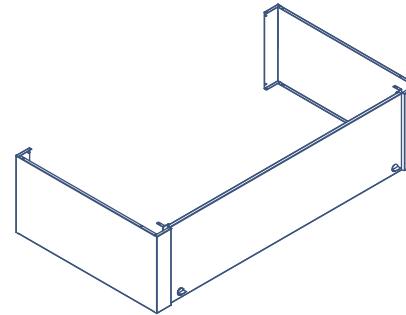

VVK-01
Vent kit

Fume hood ceiling enclosure options – need indication of enclosure type, hood size and configuration on page 41 Fume Hood Specification sheet.

ADJUSTABLE CEILING ENCLOSURE ASSEMBLY

- ▶ Model no. VCP
- ▶ Full height adjustable panel assembly that covers the full space between fume hood top and finished ceiling – Removable front panel tight in with screws

SELF SUPPORTED CEILING ENCLOSURE ASSEMBLY

- ▶ Model no. VCC
- ▶ 17" fixed height panel assembly that covers the space between fume hood top and 1" below the 108" finished ceiling. Side panels are fixed to the fume hood with a front panel easily removable for maintenance (no screws)
